PROFESSIONAL SUMMARY

Full Stack Developer with a passion for building complete web and mobile applications from the database up to the user screen. I have successfully launched everything from SaaS platforms and crypto trading apps to advanced AI tools. I specialize in building smooth, responsive frontends using React and Next.js, supported by fast and reliable server-side architecture. I enjoy working closely with clients and teams to turn ideas into live, real-world products.

TECHNICAL SKILLS

Frameworks: React, Next.js, Express, NestJS

Languages: TypeScript, JavaScript (ES6+), HTML5, CSS3/SCSS, Python

State & Validation: Redux Toolkit, Zustand, NgRx, Zod, Yup

Styling: Tailwind CSS, Framer Motion, Material UI (MUI), CSS Modules, Bootstrap

Backend & APIs: Node.js, REST, GraphQL, MCP, JWT, SMTP integration, RabbitMQ

Data & Caching: PostgreSQL, MongoDB, Redis, Firebase

Cloud & DevOps: AWS Cognito, Vercel, Docker, GitHub Actions, Git, GitHub, Firebase, AWS, Jira

Testing: Jest, React Testing Library (RTL)

SaaS & Platform: Multi-tenant systems, user roles & permissions, admin dashboards, scalable APIs, Web3

EXPERIENCE

Senior UI Developer

February 2025 – Present

Edgematics Group | Pune (Hybrid)

- Built the frontend for an advanced Agentic AI product, creating smooth user experiences around receiving and displaying live AI responses.
- Organized our projects into one large shared workspace, making it much easier for different teams to build features without breaking each other's code.
- Created a secure connection server that lets the AI safely use external tools and talk to our internal systems.
- Learned new backend languages on the job so I could help build the APIs that power the AI.
- **Achievement:** Edgematican of the quarter.

Software Developer

October 2023 – January 2025

Codes for Tomorrow | Indore (On-site)

- Built both the frontend and backend for several big projects, including a crypto investment app, a trading platform, and games like Aviator and 10 Ka Dum.
- Set up the servers to handle a lot of traffic, making sure the games and trading apps never lagged or crashed during busy times.
- Added secure login systems to keep everyone's personal data and money completely safe.
- Handled the whole project from start to finish—working on everything from the database all the way to the final user screens.
- **Achievement:** Employee of the month.

React JS Developer

April 2022 – September 2023

Eighttech Projects | Ahmedabad (On-site)

- Built the frontend for several projects, including a SaaS platform, a drone rental service, and an e-commerce website.
- Created a library of about 40 reusable UI components, which saved time and cut down repetitive work by 30%.
- Learned Web3 on the job to add new features, like allowing users to connect their crypto wallets and make secure transactions.
- Talked directly with clients to figure out what they needed, tested ideas with users, and helped launch the final products.

Web Developer

February 2020 – March 2022

Earth Technology Pvt Ltd | Kolkata (On-site)

- Developed full-stack web and mobile applications for FOS systems, education, and healthcare, handling both the frontend user experience and the backend services.
- Converted design mockups into fully responsive interfaces, making sure they worked smoothly across all browsers and screen sizes.
- Built shared backend APIs to power multiple web and mobile apps at the same time, which helped cut down on duplicate code and kept everything in sync.

Web Developer Training

August 2019 – January 2020

PHP Training Kolkata | Kolkata (On-site)

- Learned foundational web technologies including HTML, CSS, JavaScript, PHP, and jQuery.
- Practiced responsive layout (box model, breakpoints) and built a capstone site utilizing HTML/CSS, JavaScript, and PHP/MySQL CRUD on XAMPP.

PROJECTS

- **Axoma AI** (axoma.ai) – Enterprise SaaS-style agentic AI platform with orchestration, an LLM gateway, and secure workflows. (*Next.js, TypeScript, Material UI, Redux Toolkit, AG Grid*)
- **MST Blockchain** (mstblockchain.com) – Fractional investment product UI with wallet connection and fiat flows. (*React.js, Web3, Node.js*)
- **Vottcoin** (t.me/vottcoinbot) – Gamified web experience with wallet connection and rewards UX.
- **Verslan** (verslan.com) – Trading platform UI for RWA flows with emphasis on trust and task clarity.

CERTIFICATIONS

- **Certified Senior Frontend Developer** – micro1 ([View](#))
- **Responsive Web Design** – freeCodeCamp ([View](#))
- **React Native Expo for Multiplatform Mobile App Development** – Udemy ([View](#))
- **React—The Complete Guide (incl. React Hooks, Redux)** – Udemy ([View](#))
- **Front End Development Libraries** – freeCodeCamp ([View](#))
- **Docker Course from Basics to Advanced** – Udemy ([View](#))
- **JavaScript Algorithms and Data Structures** – freeCodeCamp ([View](#))
- **Prompt Design in Vertex AI** – Google Cloud ([View](#))

EDUCATION

Bachelor of Commerce

2015 - 2018

Vinoba Bhave University
